

CSU COAST
CSUMB Undergraduate Student Research Award Program
2021-22

Announcement

What: Up to \$500 available to support undergraduate research projects in marine and coastal science.

Who: The program is available to undergraduate students enrolled at CSUMB who propose a research activity on a marine- or coastal-related subject. The student must be in good academic standing (GPA > 2.0) and work with a CSUMB COAST faculty advisor. Students are encouraged to submit joint applications when appropriate. A letter of recommendation from the faculty advisor is **not** required, but you must be nominated by a CSUMB COAST faculty advisor prior to apply. You may ask a faculty member to nominate you or they may nominate you and notify you directly.

When Can I Apply: The priority deadline is **Friday, February 11th at 5pm**. If funds are still available after this deadline, applications may be accepted on a rolling basis. We expect to award a total of five \$500 awards.

How Much: Up to \$500 may be requested for supplies, software, stipend, fees (including joint applications).

How to Apply: Read the FAQs below, fill out the application form, and follow the instructions for submission.

Direct questions to Dr. Cheryl Logan: clogan@csumb.edu or Dr.
Alison Haupt, CSUMB COAST Campus Representatives

CSUMB Undergraduate Student Research Award Program

Frequently Asked Questions

1. What is the source of the funding?

Funding is provided jointly by the CSU Council on Ocean Affairs, Science and Technology (COAST).

2. What is the goal of this funding opportunity?

To support undergraduate students interested in marine-related careers and provide them with the opportunity to obtain the skills necessary to join a highly skilled, technologically advanced workforce in the marine sciences.

3. What are the eligibility requirements to apply for a grant?

Students must be enrolled at CSUMB and propose an activity on a marine-related subject. The students must be in good academic standing (GPA > 2.0) and work with a CSUMB COAST faculty advisor. A letter of recommendation from the faculty advisor is not required but you must be nominated by a CSUMB COAST faculty advisor prior to submission. Your advisor is the person working with you on the project and can be your formal advisor, a course instructor, or an interested faculty member.

4. What does it take to be a CSUMB COAST faculty?

Faculty advisors can be instructors, research associates, post-docs or on tenure-track at CSUMB. To join COAST they must join the COAST list-serve and create a Fresca profile (fresca.calstate.edu). COAST is open to anyone in the CSU with an interest in marine and coastal affairs. Contact [COAST Staff](#) for more information and to [sign up for the COAST email list](#), which provides information on COAST activities and other marine and coastal related groups, meetings, and funding opportunities.

5. When can I submit a proposal?

The priority deadline is **Friday, February 11 at 5pm.**

6. What types of projects are supported by this opportunity?

The scope of topics that can be supported include:

- The open and coastal ocean;
- Coastal zones (bays, estuaries, beaches);
- Coastal watersheds to the extent that the organism, material or process ultimately articulates with the coast (e.g., anadromous

fish, surface and groundwater flow and water quality, land use, etc.).

7. What budget items are supported by this opportunity?

Undergraduate students may request up to \$500. Examples of research-related expenses include, but are not limited to:

- Research supplies or materials;
- Travel to field site to collect samples or gather interviews or to an off campus facility to analyze samples;
- Rentals fees for boats, SCUBA or other specialized equipment;
- Sample analysis costs;
- Purchase of specialized software or equipment to analyze samples or data, including socioeconomic data.
- Stipend through CSUMB financial aid

NOTE: Funds requested for travel are a low priority for this opportunity and must be well justified to be considered. We do not support travel to meetings or workshops or requests for wages or tuition. CSU COAST offers a separate opportunity for student travel funds.

8. When do funds have to be used?

The funds must be spent or encumbered by Aug. 31, 2022.

9. What should I write for the project description?

The project description should describe the research or activity you propose to conduct in a clear and concise statement and address how the project will help you achieve your career goals. The description should describe the context for the activity, the hypotheses to be tested (if any), and the methodology to be used in the study. Projects can involve more than one student. Faculty input is strongly encouraged but the description should be written by the student.

10. How will projects be evaluated?

Proposals will be reviewed by the College of Science Faculty. Proposals will be ranked on the importance of the research, the likelihood of project completion, the impact on student success, and the need for support. Those who have not received prior funding, or funding from other sources, are given priority. Joint proposals are encouraged but funding is still limited to \$500 per proposal.
