## Student Leadership in Service Learning (sl)<sup>2</sup> Program

Service Learning student leaders implement and support CSUMB's service learning program both in the classroom and in the community. SL student leaders work as liaisons between faculty, community partners, and students to help with placement, training, and critical reflection. They also provide direct services to partner organizations.

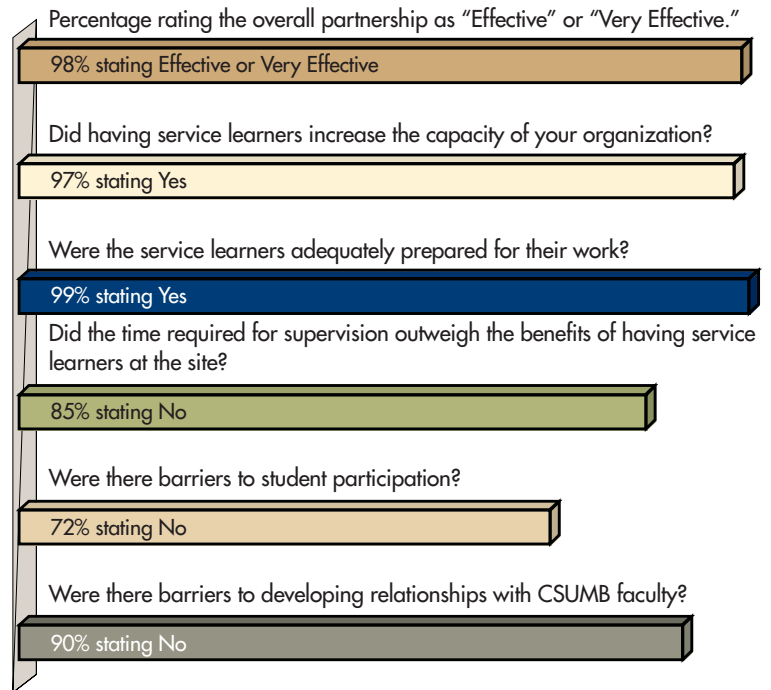

During the 2005-2006 academic year, Service Learning student leaders supported ten course sections fulfilling the Community Participation ULR and eight major-based service learning courses. In addition, student leaders led reflection activities, facilitated dialogues and caucuses on sensitive issues, and facilitated service learning presentations 14 times in service learning courses (including BUS, SBS, GS, and ISSM) that did not benefit from student leader placement. Community-based SL student leaders supported CSUMB service learners at 11 community agencies.

SL student leaders planned and implemented various co-curricular service initiatives raising more than \$5,800 (from over 600 CSUMB student donations) to provide food for families in Salinas and Pajaro Valleys. They organized education panels for the campus and community that brought more than 140 people together to discuss critical issues facing our community, and coordinated participation of 200 CSUMB students, 18 high school students, and 15 adult volunteers in the Soledad Street Revitalization Day project.
